Legal and Ethical Issues in
Information Technology

1

Ethical Concepts and Theories

ILLINOIS TECH | College of Computing

Ch2: Ethical Concepts and
Theories

PI: Intro to Morality and Moral
Systems

2

Upon completion of this Section the students should be able to:

- Define morality
- Recall the basic components of a moral system
Describe the basic components of a moral system
- Recall the four features of Bernard Gert's moral
system
- Describe and discuss the role of values in a moral
system

ITMM 485/585: Legal and Ethical in IT

3

Ethics and Morality

- The term **Ethics** is derived from **Ethos** (Greek), and
Morality from **Mores** (Latin).
- Both terms translate roughly into notions affecting
"custom," "habit," and "behavior."
- Ethics is defined as *the study of morality*, which
raises two questions:
 - 1) **What is morality?**
 - 2) **What is the study of morality?**

ITMM 485/585: Legal and Ethical in IT

4

Moral Dilemmas and Moral Issues

- **Not every dilemma is moral in nature.**
- We sometimes tend to confuse the phrases **moral
issue and moral dilemma.**
- Not every moral issue (or moral problem) that
arises is (also) necessarily a moral dilemma.
- A dilemma is a situation where one **must choose
between two undesirable options**, which often
leads to one's having to choose between **"the
lesser of two evils."**

ITMM 485/585: Legal and Ethical in IT

5

What is Morality?

- Morality can be defined as **a system of rules for
guiding human conduct, and principles for
evaluating those rules.**
- Moral rules can be understood as **"rules of
conduct,"** which are very similar to "policies."

ITMM 485/585: Legal and Ethical in IT

6

Rules of Conduct as "Policies"

- James Moor (2004) notes that **policies can range from formal laws to informal, implicit guidelines for actions.**
- Moor suggests that every act can be viewed as an instance of a policy.
- There are two kinds of rules of conduct:
 - 1) **Directives** for guiding our conduct as individuals (at the micro-level)
 - 2) **Social Policies** framed at the macro-level.

ITMM 485/585: Legal and Ethical in IT

7

Directives vs. Social Policies

- *Directives* are rules (of conduct) that guide our actions, and thus *direct* us to behave in certain ways (micro-ethical)
 - ❖ "Do not steal"
 - ❖ "Do not harm others"
- Social Policies are rules of conduct to guide our actions at the "macro-ethical" level by helping us frame *social policies*.
 - ❖ "Proprietary software should not be copied"
 - ❖ "Software that can be used to invade the privacy of users should not be developed"
- Notice *correlation between directives & social policies*, e.g. rules involving stealing

ITMM 485/585: Legal and Ethical in IT

8

Principles

- The rules of conduct in a moral system are evaluated by way of standards called *principles*.
- For example, the principle of "social utility" (i.e., promoting the greatest good for the greatest number) can be used to evaluate a social policy such as
 - "Proprietary software should not be copied without permission."
 - "laptops should be given free of charge to every student in school."

ITMM 485/585: Legal and Ethical in IT

9

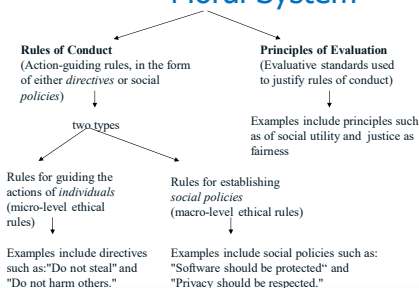

Principles (Continued)

- In the previous example, the principle of *social-utility* functioned as a kind of "litmus test" for determining whether the policy pertaining to proprietary software could be justified on moral grounds.
- A policy, X, could be justified (on utilitarian grounds) by showing that following Policy X (i.e., not allowing the unauthorized copying of software) would produce more overall social utility (greater good for society).

10

Figure 2-1: Basic Components of a Moral System

Bernard Gert's Scheme of a Moral System (2005)

Morality is a *system* that is:

- like a game, but more like an **informal game** (e.g., a game of cards)
- **public** (open and accessible to all)
- **rational** (open to reason)
- **impartial** (as illustrated in Gert's "blindfold of justice").

ITMM 485/585: Legal and Ethical in IT

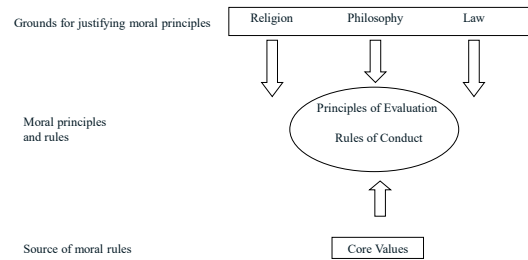

12

Table 2-1: Four Features of Gert's Moral System (2005)

Public	Informal	Rational	Impartial
The rules are known to all of the members.	The rules are informal, not like formal laws in a legal system.	The system is based on principles of logical reason accessible to all its members.	The system is not partial to any one group or individual.
